

OUTLAW

Outlaw is a diesel fuel additive for tractor and truck pullers. Smoke is unburned fuel. When you see less smoke, you know Outlaw is working.

OUTLAW BENEFITS:

- ◆ Increases Power
- ◆ Reduces Smoke
- ◆ Boosts Cetane an Average of 12 points
- ◆ Reduces Ring and Liner Wear up to 70%
- ◆ Improves Combustion Chamber and Exhaust Port Cleanliness
- ◆ Lubricates Pump and Other Fuel System Components

DIRECTIONS:

Add 1 ounce of Outlaw per gallon of diesel fuel.

ADDITIONAL INFORMATION:

This treatment level is considered a maximum load, and higher levels are not expected to produce additional benefits and are not recommended. Protect Outlaw and diesel fuel from contamination from water. If water contamination occurs, filter plugging is likely. Since increasing cetane has the effect of advancing injector timing, timing may need to be adjusted for maximum power output.

Outlaw does not significantly affect specific gravity. We have received conflicting reports of its affect on conductivity. Outlaw does not violate the rules of most pulling organizations.
